DETAILED ACTION

Claim Objections

Claims 62 and 73 are objected to because of the following informalities: Claims 62 and 73 occurs twice; therefore the numbering of the claims is inconsistency. An amendment should be made to correctly renumber the claims and its dependency starting with claim 63. Appropriate correction is required.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-32 and 48-55, drawn to tag monitoring systems, classified in class 340, subclass 568.1.
- II. Claims 33-47, drawn to a graphical user interface for map display, classified in class 340, subclass 539.2.
- III. Claims 56-78, drawn to a computer program product, classified in class 700, subclass 115.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the first invention is drawn to a

tag monitoring system and other subcombination such as the graphical user interface (GUI) and program product are merely different method for processing and displaying the monitored data. The subcombination has separate utility such as a computer program and the GUI.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and III, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
